Claims

What is claimed is:

1. An isolated human Kunitz-type inhibitor that inhibits blood coagulation in a mammal and wherein DNA sequence encoding the human Kunitz-type inhibitor hybridizes to nucleotides 138-305 of SEQ ID NO:1 under highly stringent hybridization conditions.

10

15

- 2. The isolated human Kunitz-type inhibitor of claim 1 wherein any differences between the human Kunitz-type inhibitor and amino acid number 34 to amino acid number 89 of SEQ ID NO:2 are due to conservative amino acid substitutions.
- 3. A pharmaceutical composition comprising the human Kunitz-type inhibitor of claim 1.
- 4. The pharmaceutical composition of claim 3 wherein the human Kunitz-type inhibitor is isolated from E. coli.
- 5. A DNA construct comprising a first DNA segment, wherein the first DNA segment is the DNA sequence of claim 1, operably linked to additional DNA segments required for the expression of the first DNA segment.
- of claim 5 wherein the host cell expresses the human Kunitz-type inhibitor encoded by the first DNA segment.
- 7. The host cell of claim 6 wherein the host cell is *E. coli*.

8. A method for producing human Kunitz-type inhibitor comprising:

culturing a cell according to claim 6; and

- isolating the human Kunitz-type inhibitor produced by the cell.
 - 9. The method of claim 8 wherein the cell is $E.\ coli.$

10

15

20

- 10. An isolated DNA sequence that hybridizes to nucleotides 138-305 SEQ ID NO:1 under highly stringent hybridization conditions, wherein the isolated DNA sequence encodes a human Kunitz-type inhibitor that inhibits blood coagulation in a mammal.
- 11. The isolated DNA sequence of claim 10 wherein any differences between the encoded human Kunitz-type inhibitor and amino acid number 34 to amino acid number 89 of SEQ ID NO:2 are due to conservative amino acid substitutions.
